In this study, mSMS [1], which is page-based distributed shared memory system is used for multi-node implementation of FDTD(2,4) method, and the performance evaluation is presented. For efficient large-scale acoustic analysis, it is important to employ high-order FDTD method such as FDTD(2,4) method [2], which has second-order accuracy in time and fourth-order accuracy in space.

Performance Evaluation of Acoustic FDTD(2,4) Method Using ...

Acoustic telemetry is used to quantify the movement patterns of marine fauna [1,2,3], however assessments on the performance of telemetry among different habitats is limited [4,5,6,7]. A key factor affecting the performance of acoustic telemetry is the detection range of a receiver []. The 'detection range' is defined as the maximum distance where a certain proportion of transmissions ...

Acoustic performance. Good sound insulation by walls and floors is easily achieved using the inherent mass and damping qualities of concrete. The need for additional finishes is minimal, thereby reducing capital and ongoing maintenance costs. Noise control in buildings for residential use in England and Wales is regulated using Approved Document E.
