Haliangium - Wikipedia

[singular] the natural world in which people, animals and plants live. The government should do more to protect the environment. to preserve/pollute/harm the environment; damage to the natural environment; protection/destruction of the marine environment; The environment minister expressed concern over pollution levels.

environment noun - Oxford Advanced Learner's Dictionary

A natural product is a chemical compound or substance produced by a living organism—that is, found in nature. In the broadest sense, natural products include any substance produced by life. Natural products can also be prepared by chemical synthesis (both semisynthesis and total synthesis) and have played a central role in the development of the field of organic chemistry by providing ...
