Algebra Problems

Solutions
part of a three-part series titled Problems, Theory and Solutions in Linear Algebra. This first part treats vectors in Euclidean space as well as matrices, matrix algebra and systems of linear equations. We solve linear systems by the use of Gauss elimination and by other means, and investigate the properties of these ...

Math

(a) Elimination takes linear combinations of the rows. So this singular system has the singular property: Some linear combination of the 100 rows is . (b) Singular systems $Ax = 0$ have infinitely many solutions. This means that some linear combination of the 100 columns is . (c) Invent a 100 by 100 singular matrix with no zero
