Division for Kids | Basic Math Learning Video - YouTube

While poking, rolling, and squishing playdough, children develop the small muscles in their fingers and hands. They use hands, fingers, and tools to pound, push, poke, shape, flatten, roll, cut, and scrape. Through these manipulations, children develop eye-hand coordination, the ability to match hand movement with eye movement.

Math challenges aren't always a result of a learning difficulty. For many students who struggle with math, it's simply because they don't have the proper foundation needed for success. These students may have fallen behind in a unit or moved on to advanced material before they were ready, leading to falling grades.
